

EdgeTab

BlackBerry's “Productivity Edge” – rebuilt, for any Android phone

Anyone who misses BlackBerry's pull-out edge panel: **EdgeTab** rebuilds it completely from scratch – its own code, not a line from any BlackBerry app, only open Android interfaces. A slim handle at the screen edge opens a panel of configurable cards: calendar, inbox (with reply & delete, just like the original), contacts, tasks, notes, app widgets, freely grouped app shortcuts and media control – all one swipe from the edge away.

Android 10+

Calendar card

Shortcuts (grid/list, grouped)

What's inside

- Edge handle (left or right), freely adjustable height, position, width, transparency.
- Any number of reorderable cards – each nameable, with its own icon.
- Inbox from chosen apps (BlackBerry Hub, Telegram, Signal ...) with real reply/delete.
- Calendar, contacts, tasks (JTX Board), notes, app widgets, media control.
- New: an “Active Frames” card and automatic restart after a crash.
