

EdgeTab

BlackBerry's "Productivity Edge" – rebuilt, for any Android phone

Anyone who misses BlackBerry's pull-out edge panel: EdgeTab rebuilds it completely from scratch – original code, not a line from any BlackBerry app, only open Android interfaces. Calendar, inbox (with reply & delete, just like the original), tasks, contacts, freely grouped app shortcuts, embedded widgets and media control – all one swipe from the screen edge away.

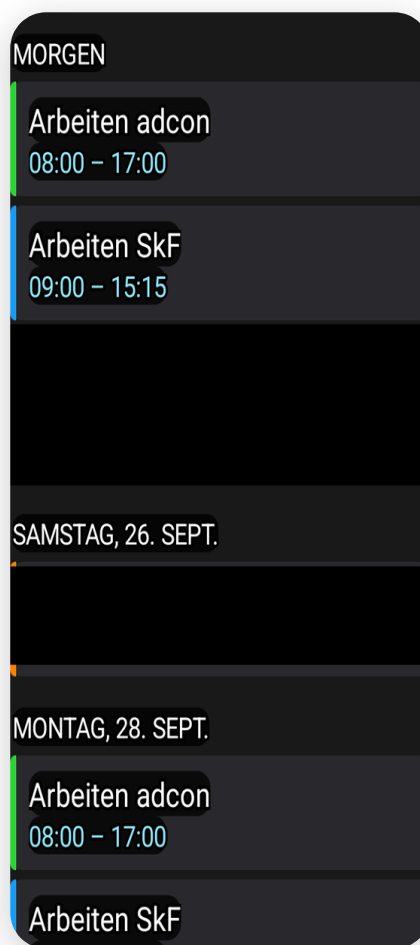

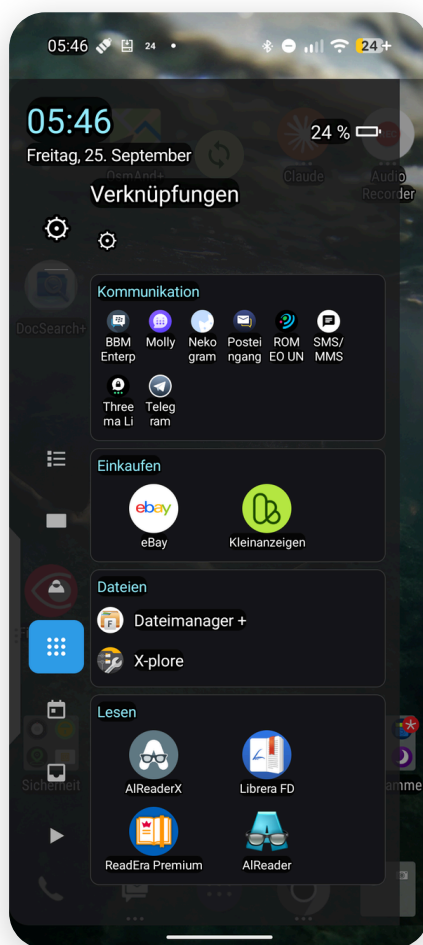

Free

Open source (GPLv3)

No ads

No tracking

No BlackBerry device needed

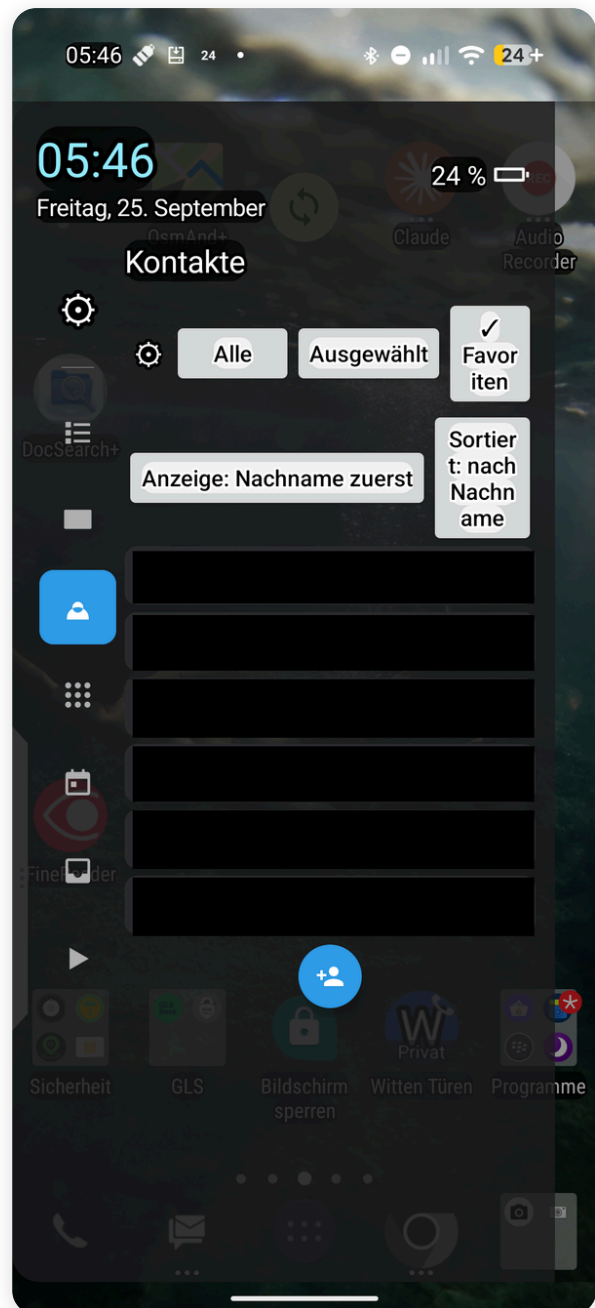

What's inside

A small selection – the full, illustrated guide is available separately.

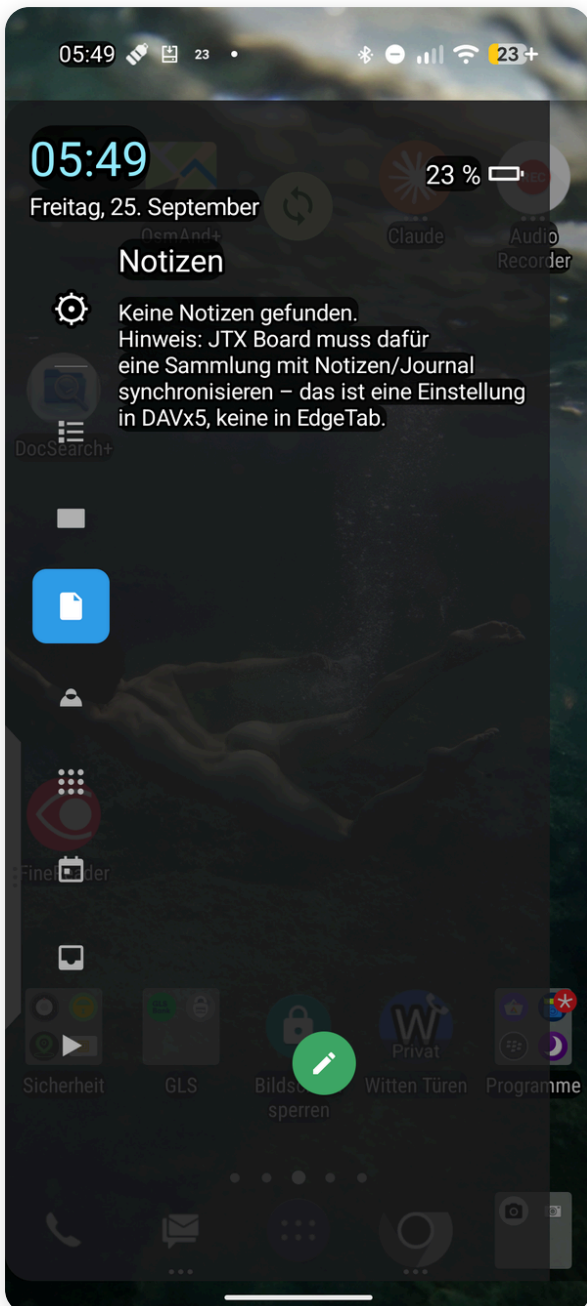

Inbox, just like the original

Collects notifications from BlackBerry Hub, Telegram, Signal, SMS and practically any other app – reply and delete trigger the real action in the source app. Categories and channel filters keep it tidy.

Contacts

All of them, a hand-picked selection, or just favorites, with photo – display and sorting freely set to first or last name.

Freely configurable cards

Any number of shortcut and widget cards, each with its own name/icon. Any home-screen widget can be pulled straight into the panel – from the Hub inbox to the weather.

EdgeTab 0.72

Eine von Grund auf neu geschriebene Nachbildung von BlackBerrys „Productivity Edge – eine aufziehbare Randleiste mit frei konfigurierbaren Karten. Kein BlackBerry-Code, nur offene Android-Schnittstellen.

Open source, verifiable

Full source code, build instructions and changelog right in the app and on GitHub. GNU GPLv3, no hidden dependencies.

System requirements

Android	10.0 (API 29) or newer.
Display over other apps	for the pull-out edge handle and the panel overlay itself.
Foreground service	keeps the edge handle available at all times, even when EdgeTab itself isn't in the foreground.
Notification access	optional, only for the inbox card – granted via its own system screen, not a normal runtime dialog.
Calendar read access	for the calendar card; new events open the installed calendar app directly.
Contacts read access	optional, only for the contacts card.
JTX Board access	optional, only for the tasks card (reads/completes tasks in the separately installed, free JTX Board app).

Try it yourself

Source code, build instructions and a ready-made APK are available on GitHub:

github.com/8818freak/EdgeTab. No Gradle, no hidden dependencies, no account needed. Feedback and ideas are welcome.
